Key Drivers:

Focused on two significant growth opportunities:

- 1 The delivery of turnkey pyrolysis projects for organic waste conversion and persistent chemical destruction. (Biogas By-Products, Biosolids & PFAS)
- 2 As a renewable infrastructure project owner, converting woody biomass and other waste streams into valuable outputs; Hydrogen, Renewable Natural Gas and Biocarbon.

Company Description:

CHAR is a cleantech development and services company, specializing in high temperature pyrolysis, converting woody materials and organic waste into renewable gases (renewable natural gas and green hydrogen) and biocarbon (activated charcoal “SulfaCHAR” and solid biofuel “CleanFyre”). Additional services include custom equipment for industrial water treatment, and providing services in environmental compliance, environmental management, site investigation and remediation, engineering and resource efficiency.

Company Profile:

CHAR Technologies Ltd is a leading cleantech development and environmental services company. CHAR specializes in delivering innovative service and technology solutions that are environmentally sustainable and cost-effective for clients.
